SPRING 2019 ELECTIVES (1/2 - 4/9)

Course	Course Name (Instructor)	Students	Max Enrollment	Location	Schedule
PHPR 7360 LR ONLY	Personal Finance (JBaker) Provides future pharmacists the informational and decision-making tools needed for planning and implementing a successful personal financial plan.	P3	80	G225	TUE 10:00-11:50
PHPR 7358 LR ONLY	PBL Therapeutics-Peds (Maples) This problem-based course will use small groups to answer different therapeutic dilemmas occurring from infancy to adolescence. Each team will be charged with raising their child throughout the semester while encountering common pediatric problems that need therapeutic intervention.	P3	12	IDW 213	FRI 10:00-11:50
PHPR 7350 LR ONLY	Advanced Compounding (Reinhardt) Provides further instruction in preparing dosage forms used in contemporary pharmaceutical compounding. The course will include weekly required reading and online assignments along with a 2-hour laboratory session. The laboratory session will begin with a 15-minute pre-lab to discuss the product being compounded and the patient.	P3	20 (min 16)	9 th fl lab Sec D	TUE 8:00-9:50
PHPR 7157 LR & NW	Entrepreneurship (Flowers) This course is designed to enhance a student's knowledge in leadership, business, and financial skills in pharmacy practice while learning if he/she possesses an entrepreneurial spirit. The goal of the course is to provide students with 'hands-on' experience in starting a business or new service, owning and running a business, and general management and leadership skills.	P1, P2, & P3	40	IDW205a/b & P16	THU 10:00-11:50
PHSC 7351 LR & NW	Toxicology (Foster) This course deals with the basic concepts of toxicology with an emphasis placed on prevention of exposure, exposure and the subsequent management of exposure of commonly found medicines, chemicals, plants and animal. Parameters that influence the toxicokinetics of these agents are emphasized.	P3	40	IDW205a/b & P16	FRI 10:00-11:50
PHPR 7153 LR & NW	Radiation Biology (Maune) Introduction to the interactions of radiation and biological systems, including chronic and delayed effects through physical and chemical changes from radiation.	P1, P2, & P3	No limit	Online	
PHPR 7154 LR & NW	Nuclear Instrumentation (Maune) Operational principles of radiation detection equipment to include statistical application and quality control.	P1, P2, & P3	No limit	Online	
PHPR 7156 LR & NW	Health Physics (Maune) A review of the legal, biological and administrative aspects of radiation protection in nuclear medicine. Emphasis on practical means of minimizing radiation exposure to the patient, staff and general public.	P1, P2, & P3	No limit	Online	
PHPR 7151 LR ONLY	Death & Dying (Hester) Interdisciplinary course preparing students to manage end-of life care, particularly through (1) exploring personal issues related to mortality; (2) learning roles of participants in such care; (3) developing communication skills needed for care giving; (4) examining ethical issues related to death; and (5) examining economic and social aspects of funeral practices.	P1, P2, & P3	15	IDW 205a/b	THU 3:15-5:15
PHPR 7362 NW ONLY	Pharmacy Practice – Infectious Disease (Dr. Dickey) This elective will provide students with opportunities for application of infectious disease principles. The course will consist primarily of team based learning facilitated by the course coordinator. There will be three core components. The first will consist of student led discussions on microorganisms, antimicrobial drug classes, and stewardship concepts. The next section will include literature reviews and debates regarding therapeutic management of various infectious diseases. In the final component, student groups will be presented with patient cases. Each group will determine a diagnosis and treatment plan that will be discussed with the class.	P3	12	P16	THU 3:00-4:50
PHPR 7367 LR ONLY	Landmark Studies (Granberry) This elective course will cover clinical trials that shape the use of pharmacotherapy. The objective is to assist the student in their ability to provide clinical evidence to support drug therapy recommendations during their clinical rotations and future practice. 2 credit hours	P3	12	IDW 114 a/b	THU 08:00-9:50

PHPR 7369	Medication Therapy Management Advanced Training (Scott)	P3	30	IDW 114 A/B & P17	THU 10-11:50
LR & NW	This elective is designed for third year pharmacy students with an interest in pharmacist-provided Medication Therapy Management (MTM) services. This course is intended to equip students with the knowledge and tools to successfully complete MTM services and approach community pharmacy with a clinical mindset in everyday practice. **\$199 Fee				
PHPR 7370	Introduction to Functional Pharmacy (Crouse)	P3	20	IDW 105 A/B & P17	THU 3:30-5:20
LR & NW	This course is designed for third year pharmacy students with an interest in providing a functional approach to pharmacy services. The Functional pharmacy model is an individualized, patient-centered, science-based approach that empowers patients and practitioners to work together to address the underlying causes of disease and promote optimal wellness.				

PEP track offerings (please see Dr. McAdam-Marx or course coordinators to discuss interest/enrollment)

Course	Course Name (Instructor)	Location	Schedule
PSGP 5109 LR ONLY	Pharmaceutical Evaluation and Policy Seminar (Li) This seminar course is designed to cover contemporary topics relevant for trainees in the Pharmaceutical Evaluation and Policy track of the Pharmaceutical Sciences graduate program.	TBA	TBA
PSGP 5119 LR ONLY	Pharmacoeconomics and Health Technology Assessment (Martin) The purpose of this course is to provide students with the skills to design, conduct, analyze and rate investigations that assess the value or outcomes of health care technologies with a focus on pharmacy related products and services. The course will also integrate the theoretical prefaces to health care technology as well as provide real world applications using decision modeling software to conduct cost effectiveness and other related studies.	TBA	TBA

Special Problems

Dept	#	Course Name (Course Coordinator)	Students	Credit Hours	Number Students
PhPr	7150	Special Problems in Clinical Practice	P1, P2, & P3	V	
PhPr	7364	Special Problems in Pharmacy Practice Academic Administration	P1, P2, & P3	V	
PhSc	7150	Special Problems in Pharmaceutical Sciences	P1, P2, & P3	V	

Special Problems Course Options

LR-Pharmacy Practice – 12th Street HWC (Dr. White) – Students enrolled in this elective will assist in the development of the UAMS 12th Street Health and Wellness Center by collecting, organizing, and managing health screening data in an electronic database, benchmarking health data with national guidelines and population trends, developing reports, developing procedures for the a telephone-based patient follow-up services, and assisting in the planning of community outreach activities. Students are asked to attend regular Community Advisory Board, Professional Advisory Board, and COP workgroup meetings related to the Center's development. Students interested in participating in this elective are asked to make an appointment to discuss the elective in person with Dr. White.

LR-Therapeutics (Dr. Franks) – Students enrolled in this 2-hour elective will help reinforce important therapeutics concepts by teaching P2 students enrolled in Therapeutics I. Students will provide weekly review sessions to discuss disease processes and their pharmacological and nonpharmacological therapies. As a result, students enrolled in this elective will gain a better understanding of therapeutics topics in preparation for advanced pharmacy practice experiences. This elective is open to up to 3 P3 students during the Spring semester.

LR-Academic Pharmacy – Interprofessional Education (Dr. Neill) – This elective will provide the student with exposure to issues facing interprofessional education curriculum development from a campus perspective. The student will meet frequently with administrators of the Office of Interprofessional Education and will assist with two to three projects during the semester that focus on issues that surface in this office. The student will assist with data collection and analysis and content development.

NW-Academic Pharmacy (Dr. Warmack) – This elective will provide the student with exposure to issues facing academic pharmacy. The student will meet frequently with the Associate Dean and will assist with projects during the semester that focus on issues that surface on the NW campus. The student will assist with data collection and analysis.

NW-Health and Wellness (Piel)- Students enrolled in this elective course will be exposed to a variety of health and wellness topics related to disease prevention and management while challenging themselves to adhere to a healthy lifestyle throughout the semester. Course topics include nutrition, physical activity, weight control, health behavior changes, and disease-specific lifestyle modifications for conditions such as hypertension and hyperlipidemia.

LR-Evidence-based Medicine and Managed Care (Dr. Johnson)

This elective will provide the student with experience in becoming familiar with new drugs as they emerge to market, improving literature appraisal skills, and with incorporating the current best literature into proposals for the Evidence-based Prescription Drug Program (EBRx) Pharmacy and Therapeutics (P&T) Committee's consideration on coverage of new drugs to market. Drug class reviews and regular presentations to the EBRx P&T committee are expected. Enrolled students can expect to gain valuable skills to prepare for residency and other postgraduate positions. (up to 4 P3 students, with interest in EBM)

LR-Qualitative Research (Dr. Teeter) – Students enrolled in this elective will learn how qualitative research methods like interviews, focus groups, and observations are used to investigate complex phenomena in healthcare. Students will be engaged with a team of researchers to assist with all phases of the research process, including objective formulation, study design, literature review, data collection, data analysis, poster preparation and presentation, and manuscript preparation. Students will have the opportunity to present the findings from these projects with the research team at state, regional, and national meetings.

LR- Oncology Basic Science Research (Dr. Aykin-Burns) – Students enrolled in this elective will be exposed to scientific method and the acquisition of new knowledge through a mentored laboratory research experience. The students will learn basics of experimental design and become skilled at laboratory techniques such as immunohistochemistry, RT-PCR, Western blotting, enzymatic activity assays. They will also actively participate in discussions of ongoing projects with other lab members. Students will have the opportunity to present the findings of their research project at state, regional and national meetings and publish their results in a peer-reviewed journal.

LR-Clinical Research (Dr. Painter) – Students will learn the technical and practical approaches necessary to conduct clinical research in patients suffering from painful conditions. Students will assist with ongoing quantitative research studies, with activities consisting of but not limited to literature review, data collection, data analysis, poster preparation and presentation, and manuscript preparation. It is expected that students in collaboration with research team members will disseminate their work through at least one presentation and publication. (4 students)

Both- Academic Pharmacy - Community Pharmacy Research (Dr. Smith) This course will introduce students to practice- based research in community pharmacy. Students will lead one research project including literature search, data collection, data analysis and presentation of findings. Students will also meet regularly with community pharmacy research group to gain feedback on their project and contribute to other practice based projects in the College. Students interested in participating should discuss the elective with Dr. Smith.

LR-Clinical Practice-Student Pharmacist Youtube Video Elective(Dr. Heldenbrand)- The purpose of this two-credit hour elective is to research and write concise "scripts" of patient counseling information for medications frequently prescribed in the United States. Students will have the opportunity to improve their writing skills and also gain experience in utilizing drug information resources. These "scripts" will be used to generate patient counseling YouTube videos recorded by UAMS student pharmacists as part of a companion Spring 2017 elective. Students enrolled in the fall elective will be given preference if they choose to enroll in the spring elective.

LR – Clinical Practice – Pediatric Antimicrobial Stewardship (Dr. Maples)- This is a 2hr elective that focuses on Pediatric Antimicrobial Stewardship. The student is required to come to ACH one morning each week to spend time preparing assigned patient/patients for rounds (approx 2 hrs) and then attend team rounds from approx 10-noon. The student will function as a part of the rounding team and be responsible for patient work-up, patient counseling, presenting recommendations on rounds, etc. Interested students must discuss first with Dr. Maples.

LR – Research (Dr. Maples)- The research elective at Arkansas Children's is a 2hr elective focusing on research skills pertaining to quality improvement surrounding antimicrobial stewardship. The student will be part of a project team where they will become familiar with IRB, study design, data collection and analysis, abstract development, and manuscript preparation. Due to the nature of research, it will not be possible to be involved in all aspects listed, but the student will be a major contributor to the research project they are working with and will hopefully lead to presentation at a local, state, or national meeting. Interested students must discuss first with Dr. Maples.
